

HAZ18 – Vermin Control

Mice, rats, flies, etc. all pose hazards to the business.

Controls

- a. Both kitchens are fitted with electro fly killers at head height in positions such that any fall-out will only occur direct to the floor.**
- b. Both kitchens have tight fitting doors and windows that are always closed during silent hours and when practical during working periods.**
- c. Metal fly screen fitted to access door between garage and corridor**
- d. General observation for signs of vermin such as “droppings”, gnawing of fittings etc.**
- e. Proactive engagement of Mr D Woodhams, Pest Control for 3 monthly check and replenishment of poison bait rat traps as necessary.**

Management of failure: any evidence of access by vermin will be managed via contract killing/trapping with our contactor above.
